Subject: Changes to plan

CC: Kevin Butters <kevinbbutters@gmail.com>
Paul,

I have almost completed making the changes to our plan based on your feed back both written and at the last meeting before christmas on dec 9th. This was the meeting we were original going to have before October 15th, but was delayed by State. The adjustments required not only changes to the narrative but required both the autocad and Earthworks drawings to be redone. This required some help which was not available over the holidays and I have personally been in poor health due to Toxic Black Mold. I am recovering but with help have nearly completed the changes and should have everything back in your hands by the end of the month. Your reciprical patience has been greatly appreciated.
